

## Ideas for collaborative research and focus group.

- ▶ Focus group (n.)
  - Important, well-defined, focused objectives.
  - Measurable and significant progress.
  - Critical mass, larger than individual PIs.
- ▶ Possible general goals for an MJO focus group
  - Better theories.
  - Better cloud microphysics schemes.
  - Better cumulus schemes etc.

### Task 2: Cloud microphysics (Radar and CRM)

Task Leads:

Investigators:

### Task 1: Process level studies.

(Surface, air, satellite observations and high resolution regional model)

Task leads:

Investigators:

### Task 3: Cumulus Parameterization

(Single column and global model, multiple parameterizations, observations and the large-domain high resolution simulations)

Task leads:

Investigators:
